### **Title: Intern**

**Role of an Intern at GE HealthCare:** The intern works on projects in the next gen visualization platform Software/Hardware development teams.

### **To succeed,**

As an intern, you should deliver on the assigned projects within the defined timelines, under minimal supervision and guidance. You should attempt to learn and understand the problem statements and offer ways to resolve the same. Learn the assigned and / or skills (technical/functional/behavioural) as required to succeed in the role achieving the desired results.

### **Desired Characteristics Preferred Qualifications**

- Be a good team player and uphold integrity.
- Open to be mentored, seek feedback.
- Strong interpersonal skills, capable of working within a globally diverse team across different time zone.

### **Qualifications/Requirements**

- M.Tech in Computer Science Engineering, Electronics & Communication Engineering, Electrical & Electronics Engineering, Electrical Engineering & Mechanical Engineering.
- 70% or 7 CGPA aggregate in the current degree.
- No active backlogs at the time of application.
- Willing to work in GE HealthCare premises during the internship.
- Willing to work on any projects as assigned based on fitment and business need.

### **Internship Duration:** 6 or 9 Months

**Note:** Intern conversion to FTE is subject to interns' performance and based on business need.
