COO Internship JD

Overview:

Juniper Internship program provides a comprehensive platform that fosters professional as well as personal growth, thoroughly preparing its interns for the next step in their careers. Project-based and involvement-oriented, an internship at Juniper allows interns to solve important problems, make lasting impacts on their teams, and contribute to the company's overall objectives. They are mentored by some of the most talented and skillful innovators in the industry; they connect with transformative thought leaders who promote disruptive ideas in their field. **Interns participate in constructive professional workshops, company-wide community service initiatives, and executive speaker series.** They build lasting friendships, expand their network, and connect with colleagues. At Juniper Networks, you will not only have opportunities to build real-life, hands-on work experience – you'll also have the chance to **learn from the best** and lay the groundwork for a successful career.
